***Election/Restrictions***

1.     Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - A. Embodiment (page 4, paragraph 48-76, claims 1 & 6) of a multi-beam transmitting/receiving apparatus and method for utilizes a reception signal power level averaged over a desired time, using the outputs from reception beam formers.
  - B. Embodiment (page 7, paragraph 77-85, claims 2-4 & 7-9) of a multi-beam transmitting/receiving apparatus and method, a reception signal power level at the time the delay times of respective multi-paths are detected from the delay profiles of respective beams which are generated by searcher is utilized.
2.     The species are independent or distinct because as disclosed the different species have mutually exclusive characteristics for each identified species. In addition, these species are not obvious variants of each other based on the current record.
3.     Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.
4.     If embodiment B is elected, a further restriction is required.
  - I. Claim 2, 4 & 7, 9 are drawn to a multi-beam transmitting/receiving apparatus and method.
  - II. Claim 3 & 8 are drawn to a multi-beam transmitting/receiving apparatus with different method of group I.
5.     Inventions, I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and

are not obvious variants, and if it is shown that at least one subcombination are separately usable. In the instant case subcombination I, II each has a different method. See MPEP § 806.05(d).

6. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) The inventions have acquired a separate status in the art in view of their different classification;
- (b) The inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) The inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) The prior art applicable to one invention would not likely be applicable to another invention;
- (e) The inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.**

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
